ABOUT ME

Driven IT student at PLV with hands-on experience in full-stack web development, database systems, networking, and object-oriented programming. Also a committed personal trainer and lifter — I bring the same discipline and goal-driven mindset from the gym into every tech project I work on. Passionate about building clean, functional solutions and constantly expanding my skills across both fitness and technology.

EXPERIENCE

Personal Trainer & Gym Attendant

Fitness Gym | 2025 – 2026 (1.5 years)

- Trained and coached gym members on proper exercise form, movement mechanics, and programming
- Designed personalized workout plans based on individual client goals, fitness levels, and schedules
- Monitored client progress consistently, tracked results, and adjusted programs for continued improvement
- Leveraged personal weightlifting background to demonstrate and teach strength training techniques effectively
- Maintained cleanliness and functionality of gym equipment and overall facility environment
- Built strong rapport with gym members, creating a positive and motivating community atmosphere
- Handled gym operations as attendant including membership assistance and daily facility management

IT Student – Academic Developer

Pamantasan ng Lungsod ng Valenzuela | 2023 – Present

- Built full-stack web systems using HTML, CSS, JavaScript, and PHP with MySQL backend integration
- Designed relational databases from scratch including ERDs, normalization up to 3NF, and stored procedures
- Developed Java OOP programs applying inheritance, polymorphism, encapsulation, and design patterns
- Created MongoDB-based systems and performed CRUD operations using MongoDB Compass
- Designed enterprise-level networking topology using Cisco Packet Tracer with OSPF, RIPv2, and EIGRP
- Participated as committee member in a PC assembly and disassembly event
- Built and deployed a personal portfolio website with CSS animations and multi-page structure

Freelance Web Developer & Graphic Designer

Independent | 2024 – Present

- Developed responsive, pixel-perfect web pages and multi-page portfolio sites for clients
- Designed jersey graphics, logos, and branding materials using industry-standard tools
- Collaborated directly with clients to understand requirements and deliver polished final outputs
- Managed project scope, revisions, timelines, and all deliverables end-to-end independently
- Maintained consistent communication with clients ensuring satisfaction throughout the project lifecycle

EDUCATION

Bachelor of Science in Information Technology

Pamantasan ng Lungsod ng Valenzuela, Valenzuela City | 2023 – Present

- Relevant coursework: Networking, Advanced Database Systems, OOP, Web Development, IT Research

HARD SKILLS

Languages: HTML · CSS · JavaScript · PHP · Java · Python · SQL

Databases: MySQL · MongoDB

Networking: Cisco Packet Tracer · OSPF · RIPv2 · EIGRP · DHCP · DNS

Concepts: OOP · ERD & Normalization · Stored Procedures · Full Stack Web Dev · Design Patterns

SOFT SKILLS

Critical Thinking · Fast Learner · Problem-Solving · Self-Motivated · Detail-Oriented · Collaborative · Goal-Driven · Adaptable · Disciplined · Customer Service · Time Management · Communication

TOOLS & TECHNOLOGIES

VS Code · GitHub · Git · Canva · Cisco Packet Tracer · MySQL Workbench · MongoDB Compass · Figma · LibreOffice · ElevenLabs · Android Studio

CERTIFICATIONS

- Cisco – Introduction to Packet Tracer (Cisco Networking Academy)
- CodeSignal – Python with SQL

PROJECTS

- Julie Repol Beauty Salon – Full-stack salon reservation web system with PHP/MySQL backend and admin dashboard
- PLV Research – Generative AI Literacy and Career Confidence Among BSIT Students (Academic Paper)
- Bunker Management System – Java OOP project with full class diagrams and design pattern implementation
- Enterprise Network – Cisco Packet Tracer topology with 8 subnets, 80 PCs, DNS, and multi-protocol routing
- Personal Portfolio – Multi-page HTML/CSS/JS site with scroll animations, gallery, and certificate showcase

INTERESTS

Weightlifting & Strength Training · Fitness Coaching · Web Development · Graphic Design · Content Creation (YouTube – Ancient & Dark History) · Cryptocurrency & Trading · Tech Exploration
